

RE20xx DECOGRIP SOLUTION

Protection-Finishing-Maintenance of all surfaces

Field of application: wood, metal, wall, fabric, plastic, glass, ceramic. Both indoor and outdoor objects.

Information: it is a pigmented topcoat with high covering power and high grip over all surfaces. It is resistant to UV light and atmospheric agents. It is easy to apply. It has great distension.

Instructions

New wood. Sand with 150-180 grit sandpaper and clean the surface from dust and grease by means of acetone, because these substances could avoid the adhesion of the coating. If the object is exposed outdoors, it is recommended to treat it previously with a coat of Wood stain RMxx10. **Coated wood.** Sand the support with 180-240 grit sandpaper. If some coating films peeled off, make sure to remove them completely. Clean the surface from dust and grease by means of acetone, then apply Decogrip all-purpose enamel RE20xx in more than one coat, depending on the required covering power and effect. **Metal.** To decorate rusty metal surfaces, remove the rust with brush or sandpaper before the application of Decogrip all-purpose enamel RE20xx. **Plastic.** Given the huge variety of available supports, it is previously necessary to evaluate the adhesion over the support. Before the application, clean the surface from dust and grease by means of acetone. To increase the adhesion, it is possible to sand slightly the support with 180-240 grit sandpaper. **Glass and ceramic.** After evaluation of support adhesion, add 2% of RY0406 adhesion promoter. Clean the support with RR1050, then proceed to coating.

Overcoating: Decogrip All-purpose enamel RE20xx, natural Decorative oil R03000, RP2260 Floorings and Furniture topcoat.

Packaging: 0,5 L, 2,5* L, 5* L (only for RE2021).

Storage at not less than 5°C

Painting at not less than 10°C

Ready to use

Application by brush, spray gun or roller

Yield per coat 10-12 m²/L

Mix it well before use

Drying time between the coats 4-24 hours

Final drying time 48 hours
